

Why E-Verify+?

-  We're making it **easier for employers and employees** to comply with laws and regulations.
-  Less burden for employers, with **less time spent in the process**. Less apprehension and worries from employees, since they enter their own data in a secure way.
-  **More practical than before** for employees, as they can carry their employment eligibility verification status to their next job.
-  **It increases integrity of the employment verification process** through the system capability to photo match against existing databases.

Employers can now find their employee's documents and Form I-9 all in one place: their E-Verify account. E-Verify+ will give employees the ability to electronically complete the Form I-9 and receive case status notices directly. This means time saved and fewer data entry errors.

Employees have more control of their preferred documents as they complete and submit the Form I-9 and their preferred acceptable documents securely from any internet-connected device. They can also stay informed by receiving notifications directly, and after completing this process once, their employment eligibility can be carried through to future E-Verify+ employers.

The  makes it so much easier to:

Click, confirm and carry on.
